PROFILE

Software Engineering graduate with a strong foundation in frontend development using HTML5, CSS3, JavaScript (ES6+), Bootstrap and React.js. Experienced in building responsive web applications and working with modern frontend tools. Currently expanding technical knowledge by learning Python, while also bringing experience in client communication, sales outreach and business development. Seeking an entry-level Frontend Developer opportunity to apply technical skills and grow professionally.

PROJECTS

Social Media App , React.js

- Built a responsive social media application using Context API, useReducer, React Toastify, React Icons and Local Storage.
- Implemented component-based architecture and interactive UI.

React Todo App , React.js

- Developed a Todo application using Context API and useReducer for state management.
- Implemented reusable components and task management functionality.

Currency Converter , JavaScript (ES6+)

- Built a currency converter with API integration, Fetch API and async/await.
- Designed a responsive interface using HTML5 and CSS3.

Rock Paper Scissors Game , JavaScript (ES6+)

- Created an interactive game featuring computer-generated choices, sound effects and score tracking.

PROFESSIONAL EXPERIENCE

Sales & Business Development Associate, Digital Mindset Hub
September 2026 – November 2026 | Hyderabad, Pakistan

- Researched potential clients and identified local businesses for digital marketing services.
- Presented social media management and digital marketing packages to prospective clients.
- Managed client outreach, follow-ups and meeting coordination.

Accountant, Shafique Niazi High School
October 2021 – January 2022 | Hyderabad, Pakistan

- Prepared student datasheets, marksheets, fee challans and fee cards using MS Excel and Word.
- Maintained fee-related records and communicated with parents regarding fee structure
